3. Program description

The master's degree in Psychomotricity deepens theoretical knowledge and practical skills on the different areas of knowledge of Psychomotricity. In this master's degree, a scientific attitude towards knowledge and research methodologies is also deepened.

In particular, the master's degree in Psychomotricity aims to train psychomotor therapist capable of providing an adequate response to the needs associated with the practice of Psychomotricity in its various areas of intervention - preventive, educational, re-educational, therapeutic. Theoretical knowledge and practical skills are deepened, allowing the understanding of the influence of psychomotor practice in these areas, throughout the life span.

The Master's Degree in Psychomotricity grants the recognition of functions and skills of psychomotor therapist Grade II, by the Portuguese Association of Psychomotricity, only after attending a 1st Cycle training in the specific, scientific, and professional scope of psychomotricity, such as the degree in Psychomotor Rehabilitation (psychomotor therapist Grade I).

The master's degree in Psychomotricity concludes with a master's Dissertation or with an internship and respective Internship Report. Only students with the 1st cycle in Psychomotor Rehabilitation (or a degree in Special Education and Rehabilitation), that is, psychomotor therapist Grade I, can undertake an internship and the respective Internship Report. Students from other areas must go on to the dissertation. The internship can be carried out in public and private entities, in the educational, medical, or social sectors, within the scope of education, therapy and rehabilitation. The offer of internships and respective vacancies is dependent on the number of interested students, the availability of the entities hosting internships and the University's supervisors.

4. Career opportunities

Given the interdisciplinary training offered by this master program, students will be able to develop psychomotor interventions of therapeutic, preventive, rehabilitative and re-education aids. It is worth mentioning the intervention in clinical and hospital settings, kindergartens and day care centers, inclusion resource centers, institutions for the support of people with disabilities or groups at risk of social exclusion, homes and day centers for the elderly, and specialized institutions (including hospitals and clinics) in the field of neurodevelopment and mental health for children and adolescents and for adults.

8. General conditions of access and admission

i Legal conditions for access to the cycle of studies leading to the master degree

Those who meet the following conditions may apply to the cycle of studies that leads to the master degree:

- Holders of the bachelor degree or legal equivalent;
- Holders of a foreign academic degree fully recognised as satisfying the objectives identical to the bachelor degree by the relevant scientific body of the higher education institution they wish to be admitted to;
- Holders of an academic, scientific or professional curriculum vitae that is recognized as attesting to the capacity to carry out this cycle of studies by the relevant scientific body of the higher education institution they wish to be admitted to.

ii Conditions of access to the cycle of studies at the Universidade de Évora

On the application date, the undergraduate students must satisfy conditions that guarantee the conclusion of their undergraduate degree until the 30th of October of the admission year. The admission and enrollment of these students is conditioned on the conclusion of the degree until this date, and the enrollment is canceled if the student does not complete the degree within that period

During the first application phase, students who have a maximum of 6 curricular units or 36 ECTS missing for conclusion of their degree can apply for the 2nd cycle; in the 2nd application phase students can apply if they have at most 3 curricular units missing and in the 3rd application phase if they have at most one curricular unit missing

The previous condition does not apply to students with a curriculum that reveals professional or scientific experience, which can be recognized by the competent scientific body, as attesting the students ability to carry out the masters degree/post-graduation, provided that the student required that recognition in the application process
