3. Program description

The increasing scarcity of water for irrigation makes it imperative to improve its efficiency of use. Nowadays, this is possible with the use of various digital technologies.

The objective of this course is to introduce students to the different digital technologies that can be used in irrigation management, providing them with information and knowledge that will allow them to use these technologies to improve irrigation practices with the aim of increasing the productivity of agricultural production, but also from an environmental perspective of preserving water resources.

4. Objectives

The objective is for students to acquire skills in: i) identifying the best irrigation strategy for their particular situation, depending on the crop, soil and water availability; ii) choosing the technologies to be used to monitor the water deficit of plants; iii) identifying the need for differentiated irrigation management.
